ABOUT ME

Methodical and detail-oriented Software Engineer specializing in C#/.NET, with 3+ years of experience designing scalable systems across IT, supply chain, and finance sectors. Passionate about continuous learning, efficiency, and problem-solving. I enjoy working in structured and collaborative environments.

EDUCATION

Microsoft PGCert Full-Stack Software Engineering	Lorient, FR Sep 2022 - Feb 2023
Clermont Auvergne University B.S. Statistics and Business Intelligence <i>GPA: 3.6</i>	Aurillac, FR Sep 2020 - Jul 2022
Camille Claudel S.H.S. Computer Networking and Communication Systems <i>GPA: 3.7</i>	Clermont-Ferrand, FR Sep 2017 - Jul 2020

EXPERIENCE

Freelance <i>Software Engineer</i>	Kuala Lumpur, MY Dec 2023 - Present
- Designed secure REST APIs using ASP.NET Core (Clean Architecture, JWT, validation, rate limits). - Used EF Core with migrations, optimized LINQ; boosted performance with indexing and profiling. - Set up CI/CD automation (Azure DevOps): builds, xUnit, Docker; health checks and structured logs. - Built normalized relational DB (3NF) in SQL Server and optimized indexing for high-read workloads.	
AUSY <i>Software Engineer</i>	Lorient, FR Feb 2023 - Nov 2023
- Engineered a concurrent C# supply-chain algorithm: ~30% faster deliveries and higher throughput. - Developed a C# WPF (MVVM) app with EF and LINQ, applying SOLID and async/await. - Built microservices for ingestion, processing, and APIs; containerized with Docker and CI/CD. - Led Agile (SCRUM) delivery with unit tests, model validation, and comprehensive documentation.	
Michelin <i>Software Engineer</i>	Clermont-Ferrand, FR Apr 2022 - Jul 2022
- Optimized Oracle PL/SQL scripts, increasing log processing efficiency by ~45% and reducing latency. - Built a C# WPF (MVVM) real-time dashboard with live metrics, alerts, and operator workflows. - Automated ETL pipelines and SQL Server Agent jobs to ensure timely, validated reports. - Automated AD/DB administration with C# and PowerShell, reducing manual operations and errors.	

SKILLS

Programming:	C# (.NET6+ / ASP.NET Core), TypeScript (Angular), Python, PowerShell, Bash
Databases:	SQL (MS SQL, MySQL, PostgreSQL), NoSQL (MongoDB, Redis), ORM (EF Core)
Backend & APIs:	LINQ, REST, gRPC, Swagger / OpenAPI, RabbitMQ, SignalR, Middleware
Infrastructure:	Docker, Terraform, AWS, Azure DevOps (CI/CD), Prometheus, Grafana, ELK Stack
Data & ETL:	SSIS, Talend, Power BI, cron, Data Warehousing / Modeling / Transformation
Methodology:	Agile / Scrum, SDLC, UML, TDD, SOPs, SOLID, Clean Architecture
Others:	xUnit, Serilog, Postman, JWT/OAuth 2.0, OWASP Top 10

Languages: French (C2 - Native), English (C1 - Fluent)

PROJECTS

Supply Chain & Intralogistics Analytics C#/.NET-based intralogistics platform with optimization algorithms; microservices using ASP.NET Core and RabbitMQ; PLC communication for real-time events; EF Core with LINQ/migrations, Redis caching; WPF dashboards and reliable APIs driving measurable efficiency gains.	Fives Group
Crypto Scoring & Investment Analysis Python/.NET scoring program: statistical modeling and signal detection; tested pipelines, reproducible analytics, and actionable insights for investment decisions.	Astrumia
Open Source Contribution Contributed to open-source projects, including game scripting, Linux server automation, package installers, and algorithmic problem-solving, using C# as well as Bash and PowerShell.	Github/Sterbweise
