ABOUT ME

Methodical and detail-driven Software Engineer C#/.NET with 3+ years of experience building scalable systems across IT, supply chain, and finance. Motivated by continuous learning and delivering impactful solutions in finance and technology, with a focus on collaboration, problem-solving, and driving efficiency.

EDUCATION

Microsoft PGCert Software Engineering & Development	Lorient, FR Sep 2022 - Feb 2023
Clermont Auvergne University B.S. Statistics and Business Intelligence <i>GPA: 3.6</i>	Aurillac, FR Sep 2020 - Jul 2022
Camille Claudel S.H.S. Computer Networking and Communication Systems <i>GPA: 3.7</i>	Clermont-Ferrand, FR Sep 2017 - Jul 2020

EXPERIENCE

Freelance <i>Software Engineer</i> - Built secure REST APIs in ASP.NET (Clean Arch, JWT, validation, rate limits). - Used EF Core with migrations, optimized LINQ; boosted performance with indexing and profiling. - Set up CI/CD (Azure DevOps): builds, xUnit, Docker; health checks and structured logs. - Built normalized data models (3NF) in SQL Server and optimized indexing.	Kuala Lumpur, MY Dec 2023 - Present
AUSY <i>Software Engineer</i> - Engineered a concurrent C# supply-chain algorithm: ~30% faster deliveries and higher throughput. - Developed a C# WPF (MVVM) app with EF and LINQ, applying SOLID and async/await. - Built microservices for ingestion, processing, and APIs; containerized with Docker and CI/CD. - Led Agile delivery with unit tests, model validation, and thorough documentation.	Lorient, FR Feb 2023 - Nov 2023
Michelin <i>Software Developer & Data Analyst</i> - Improved Oracle PL/SQL scripts, improving log processing efficiency by ~45%. - Built a C# WPF (MVC) dashboard with real-time metrics, alerts, and operator workflows. - Automated ETL pipelines and SQL Server jobs to deliver validated, on-schedule reporting. - Automated AD/DB administration with C# and PowerShell, reducing manual operations and errors.	Clermont-Ferrand, FR Apr 2022 - Jul 2022

SKILLS

Programming:	C# (.NET/ASP.NET), TypeScript (Angular), Python, PowerShell, Bash
Databases:	SQL (MS SQL, MySQL, PostgreSQL), NoSQL (Redis, MongoDB)
Backend & APIs:	EF, LINQ, OpenAPI, Swagger, gRPC, RabbitMQ
Infrastructure:	Docker, Kubernetes, VMWare, NGINX, Terraform, SOPS
Cloud & DevOps:	AWS, Azure DevOps, Git, CI/CD, Jenkins, Prometheus, Grafana, ELK Stack
Additional:	Talend, SSIS, ETL, Power BI, xUnit, Postman, Moq, SDLC, TDD, UML, Agile/Scrum
Languages:	French (C2 - Native), English (C1 - Fluent)

PROJECTS

Supply Chain & Intralogistics Analytics C#/.NET intralogistics platform with optimization algorithms; microservices using ASP.NET Core and RabbitMQ; PLC communication for real-time events; EF Core with LINQ/migrations, Redis caching; WPF dashboards and reliable APIs driving measurable efficiency gains.	Fives Group
Crypto Scoring & Investment Analysis Python/.NET scoring program: statistical modeling and signal detection; tested pipelines, reproducible analytics, and actionable insights for investment decisions.	Astrumia
Open Source Contribution Created an open-source solution, implementing new features and improving performance for the community.	Github/Sterbweise
